

Dialight

Dialight LED Lighting Catalog - UL

for Industrial and Hazardous Locations

February 2018

Cost-Effective

Low maintenance integrated design, high efficiency, and an industry leading warranty equal significant time and cost savings.

Sustainable

A strategic focus on environmentally friendly LED technology and a commitment to helping all organizations, including our own, reach corporate sustainability goals.

Convenient

Fixtures deliberately designed with no field replacement parts for the lifespan of the fixture and easy retro-fit kits to make installation and maintenance turn-key.

Safe

Solutions designed for the world's most demanding industrial environments. Fully integrated designs and extensive testing ensure that you can count on our solutions every minute of the day.

Intelligent

Controlled lighting solutions that can seamlessly integrate with existing factory automation and building management systems to conveniently optimize work site safety and productivity.

Trusted

Deep expertise exclusively in LED lighting technology and decades of experience as a partner to many of the world's leading organizations has helped us achieve the largest installed base of industrial LED fixtures in the world.

Dialight's Industry Leading 5, 7 and 10 Year Warranties

At Dialight, we take great pride in the design and robust engineering of our products. We deeply understand the harsh environments that our customers depend on our fixtures to illuminate each day. That's why our fixtures are built specifically for longevity in these conditions.

We are the only industrial LED lighting supplier with fully-integrated products built for industrial applications, featuring custom in-house power supplies designed for long-life with superior temperature tolerance, vibration resistance and built-in surge protection. Additionally, our sealed fixtures prevent moisture and contaminants from causing failures or reducing lifespan.

We stand behind our industry leading warranties with proven real-world results in the world's most challenging environments and extensive quality control testing. Additionally, whilst some other manufacturers may require a minimum threshold of 10% or more of LED components to fail in order for a product to be defective, we do not require this because the safety and productivity of your work site is of paramount importance to us.

If you would like to learn more about our warranties, please find the full warranty terms & conditions available on our website www.dialight.com

Hazardous Locations Ratings

Fixed and portable fixtures for installation and use in hazardous (classified) locations Class I, Divisions 1 and 2, Groups A, B, C, and D; Class II, Division 1, Groups E, F, and G; Class II, Division 2, Groups F and G; and Class III, Divisions 1 and 2, in accordance with the National Electrical Code, NFPA 70

Classes

The classes define the general nature of hazardous material in the surrounding atmosphere.

Class	Hazardous Material in Surrounding Atmosphere
Class I	Hazardous because flammable gases or vapors are present in the air in quantities sufficient to produce explosive or ignitable mixtures
Class II	Hazardous because combustible or conductive dusts are present
Class III	Hazardous because ignitable fibers or flying's are present, but not likely to be in suspension in sufficient quantities to produce ignitable mixtures. Typical wood chips, cotton, flax and nylon. Group classifications are not applied to this class

Divisions

The division defines the probability of hazardous material being present in an ignitable concentration in the surrounding atmosphere.

Division	Presence of Hazardous Material
Division 1	The substance referred to by class is present during normal conditions
Division 2	The substance referred to by class is present only in abnormal conditions, such as a container failure or system breakdown

Groups

The group defines the hazardous material in the surrounding atmosphere.

Group	Hazardous Material in Surrounding Atmosphere
Group A	Acetylene
Group B	Hydrogen, fuel and combustible process gases containing more than 30% hydrogen by volume or gases of equivalent hazard such as butadiene, ethylene, oxide, propylene oxide and acrolein
Group C	Carbon monoxide, ether, hydrogen sulfide, morphine, cyclopropane, ethyl and ethylene or gases of equivalent hazard
Group D	Gasoline, acetone, ammonia, benzene, butane, cyclopropane, ethanol, hexane, methanol, methane, vinyl chloride, natural gas, naphtha, propane or gases of equivalent hazard
Group E	Combustible metal dusts, including aluminum, magnesium and their commercial alloys or other combustible dusts whose particle size, abrasiveness and conductivity present similar hazards in connection with electrical equipment
Group F	Carbonaceous dusts, carbon black, coal black, charcoal, coal or coke dusts that have more than 8% total entrapped volatiles or dusts that have been sensitized by other material so they present an explosion hazard
Group G	Flour dust, grain dust, flour, starch, sugar, wood, plastic and chemicals

Corrosion Protection and Coating Process

Surface Preparation

Industry-Standard

- Acid etch iron phosphate conversion
- Rinse
- Acid seal

Industry standard product after 3000-hour Salt Spray Testing (ASTM B117)

Dialight

- Proprietary alkaline etching
- Multiple reverse osmosis rinse removing calcium and minerals
- Proprietary surface conversion for chemical and mechanical bond to powder
- Final clean rinse using pure reverse osmosis water

Dialight product after 3000-hour Salt Spray Testing (ASTM B117)

Powder Coat

Industry-Standard

- Single layer hybrid epoxy - standard polyester powder coat

Dialight (2 coats)

- 1st coat
Epoxy primer base coat (much better bonding to the aluminum than polyester)
- 2nd coat
Super durable polyester (better UV, chemical, salt and environmental resilience)

Vigilant® LED Lighting Fixtures

for Industrial Applications

LED High Bay

Wattage Range:	80-186W
Lumen Output Range:	11,000-26,250lm
Lumens per Watt:	100-145
Input Voltage:	100-277 VAC 120-250 VDC

LED High Bay - Passive Power Supply

Wattage Range:	73-206W
Lumen Output:	9,750-27,000lm
Lumens per Watt:	101-131
Input Voltage:	347 VAC or 480 VAC

LED Low Bay

Wattage Range:	42-154W
Lumen Output:	3,500-18,000lm
Lumens per Watt:	42-154
Input Voltage:	100-277 VAC 347/480 VAC

LED High Bay - High Output

Wattage Range:	380-520W
Lumen Output:	42,500-60,000lm
Lumens per Watt:	108-125
Input Voltage:	120-277 VAC, 347/480 VAC

LED Dual Floodlight

Wattage Range:	190-457W
Lumen Output Range:	27,000-56,000lm
Lumens per Watt:	111-147
Input Voltage:	120-277 VDC, 120-250 VDC, 347/480 VAC

Notes
1) Operating Voltage A - 347/480 VAC will ship with wiring box and transformers. Choose HE prefix for this option. For 480 VAC add 12W, for 347 VAC add 29W.
2) Lumen type based on using a glass lens. See tables for lumens when changing lenses on page 16-17.
3) When ordering factory installed occupancy sensor, use prefix HC for 100-277 VAC models, use prefix HE for 347/480 VAC models.
4) HC & HW prefixed models have the ability to add wireless & DALI controls
5) Passive only available with HE product code and medium optics. Not available with controls options or acrylic lens options.
Additional features and selections are available, please see the UL High Bay Technical Spec Sheet or your Dialight representative for more information.

Notes

- 1) Operating Voltage A - 347/480 VAC will ship with wiring box and transformers. Choose LE prefix for this option. For 480 VAC add 12W, for 347 VAC add 29W.
- 2) Lumen type based on using a polycarbonate dome lens. See tables for lumens when changing lenses on page 23.
- 3) When ordering factory installed occupancy sensor, use prefix LC for 100-277 VAC models, use prefix LE for 347/480 VAC models.
- 4) LC & LW prefixed models have the ability to add wireless & DALI controls

Additional features and selections are available, please see the UL Low Bay Technical Spec Sheet or your Dialight representative for more information.

This fixture is offered in sustained and maintained configurations.

Sustained has a single AC input and battery backup mode is entered upon any loss of power. Fixture cannot be turned off without entering battery backup mode.

Maintained has two AC inputs. The fixture can be turned on and off via AC-1 and Fixture only enters battery backup mode when AC-2 is lost or low.
