

ENVIRONMENTAL, HEALTH AND SAFETY POLICY

Dialight seeks a sustainable business model; we are fully committed to the health and safety of our associates, as well as the protection of the environment. We will pursue this commitment by:

1. Complying with all local, state, and federal health, safety and environmental regulatory guidelines.
2. Manage EHS risks and performance effectively. Actively seeking and acting upon meaningful opportunities to reduce risk and improve our EHS performance.
3. Promoting resource conservation, pollution prevention and waste minimization.
4. Reducing our environmental impact by recycling/reusing materials wherever possible.
5. Promoting energy conservation.

We will practice good product stewardship using process management and material management to ensure that our processes and products remain environmentally safe.
