

DIALIGHT INDUSTRIAL LED LIGHTING

For Chemical &
Petrochemical
Applications

AMERICAS

Dialight

WHY LIGHTING MATTERS in Chemical and Petrochemical Applications

Lighting is of critical importance in Chemical and Petrochemical plants to maximize both safety and productivity. These sites are among the most dangerous places to work due to the presence of volatile chemicals and explosive environments. It is without question that the lighting must be able to prevent and withstand combustible and explosive atmospheres while also providing clear illumination for workers to read color coded safety labels. For this reason, and the fact that workers can struggle with fatigue when operating complicated, specialized equipment for long periods of time, the Chemical Safety Board recommends bright white lighting.

Airborne substances, including caustic chemicals and vapors

High vibration and humidity

Noisy, complex heavy machinery

Physical hazards, such as slips, falls, and moving objects

Power surges and electric shock

Flammable and explosive environments

Chemical Safety Board reference: ANSI/API RP 755: Fatigue Risk Management System

THE COST OF POOR LIGHTING in Chem/Petrochem Applications

Poor illumination can contribute to tragic work site accidents and injuries in the Chemical and Petrochemical sector. Between 2009-2018 the US Bureau of Labor statistics cited:

185,400
NON-FATAL
INJURIES with 
\$6.5
BILLION TOTAL COSTS

250 
FATALITIES with **\$257**
MILLION TOTAL COSTS

The Chemical and Petrochemical industry involves risks and hazards that demand high quality lighting. What's more, the Chemical and Petrochemical industries have been global leaders in sustainability, offering essential materials and energy, while seeking to reduce harmful emissions. Dialight industrial LED lighting is engineered to maximize safety while minimizing environmental impact. When choosing a lighting partner for your facilities, care must be taken to ensure their products have proven to perform safely and reliably in your environments and offer a sustainable solution.

DIALIGHT SOLUTIONS for Chemical and Petrochemical Applications

Dialight is the world leader in industrial LED lighting technology with millions of fixtures installed worldwide. We specialize in lighting products designed for the world's harshest industrial environments – enabling industrial customers to reduce their energy costs, maintenance costs, and carbon footprint while maximizing the safety and productivity of their employees and facility. From our signature High Bay line to our versatile Linear fixtures, Dialight offers a large selection of rugged products ideally suited for environments found within the Chemical and Petrochemical Industry.

WHERE TO USE DIALIGHT PRODUCTS in Chem/Petrochem Applications

- TANK FARMS
- LABORATORIES
- MAINTENANCE SHOPS
- CHEMICAL STORAGE
- PROCESS AREAS
- COOLING TOWERS
- MCC/ELECTRICAL EQUIPMENT ROOMS
- WATER TREATMENT
- CATWALKS
- CONVEYORS (FOR STANCHION MOUNTS)
- WAREHOUSES AND GENERAL AREAS
- GENERAL FLOOD LIGHTING
- RAIL YARDS
- LOADING/UNLOADING AREAS

See product portfolio pages for more detailed product and ordering information

TECHNOLOGY DIFFERENTIATION

When choosing an LED Lighting partner, consider how their products are engineered, constructed and tested prior to making your decision. Most Dialight products are engineered to a **10 year warranty** and were designed with harsh environments, such as Chemical and Petrochemical Plants, in mind.

CUSTOM POWER SUPPLIES

Long-life potted drivers with optimized thermal dissipation for protection against environmental contaminants and vibration related failures.

LOW MAINTENANCE MECHANICAL DESIGN

Sealed and optimized to reduce or eliminate the need for maintenance over the life of the fixture. Easy to install and retrofit to existing infrastructure.

LATEST LEDS AND ADVANCED OPTICS

Highly efficient, crisp, low-glare illumination. Lighting where you need it, not where you don't.

INTELLIGENT CONTROLS

Flexibility to group, dim and schedule lights around the unique needs of a facility to maximize energy savings. Plus, seamless integration with existing factory automation.

APPLICATION GUIDE for Chemical and Petrochemical Sites

2 SafeSite® and Vigilant® Area Lights
For hazardous and non-hazardous lower ceiling indoor or outdoor process and stanchion mount applications*

1 SafeSite® High Bay
Hazardous location chemical storage and processing

8 Reliant™ High Bay
For indoor, light industrial applications and lighter-duty areas of heavy industrial facilities, such as warehouses

7 SafeSite® and Vigilant® LP/TC Linears
For hazardous and non-hazardous indoor or outdoor fluorescent strip/vaportite replacements, task or inspection lighting, electrical rooms, shops, and process areas. 4ft and 2ft versions available

3 Vigilant® High Bay
For non-hazardous indoor or outdoor high bay applications over 14 feet

4 SafeSite® and Vigilant® Low Bays
For hazardous and non-hazardous lower ceiling indoor or outdoor applications where wider light distribution is critical

5 StreetSense® Street Light
For plant maintained roadways and general outdoor illumination

6 ProSite Floodlight
For non-hazardous and hazardous indoor or outdoor flood lighting applications; multiple beam patterns available

CASE STUDIES Diamond Vogel *Tulsa, Oklahoma*

Because of the potential for airborne particles and fumes, the Diamond Vogel facility is a Class I Div 2 hazardous environment, which imposes strict requirements on the type of fixtures that could be used safely inside. Not only must they be hazardous certified, but heat is also a concern, as temperatures routinely reach 110° F under the scorching midwestern sun. With over fifty 11,000 lumen, six 14,000 lumen and six 26,000 lumen Class I, Div. 2 SafeSite® High Bays now in place, Production Supervisor Alton Wells says it's "like night and day" inside the facility. To add, they were able to reduce their fixture count by about 10 lights. Because several of the fixtures Diamond Vogel chose included Dialight's standard AC & DC capability, the fixtures could easily be configured into a battery backup system, this not only substantially improved egress and safety lighting, but also cut down on maintenance of the system. Now, the facility has 13 battery backup lights, all wired into a transfer switch and central DC power supply. That means multiple points of safety lighting, with just one point of maintenance.

- Installed 63 Dialight SafeSite High Bay fixtures and 6 linears
- Incandescent lighting maintenance was an ongoing chore
- Poor light quality hindered productivity and quality control
- Class I Div. 2 hazardous environment
- Reduced fixture count by 10

CASE STUDIES Rubis Terminal *Rotterdam, The Netherlands*

Rubis Group is the fifth largest independent operator in Europe of downstream petroleum and chemical facilities. With a new Rotterdam location, designers were looking for a better solution, aiming to light the new facility with the latest-generation LED fixtures to provide the most energy efficient, safe and reliable illumination. Because of its harbor location, reducing light pollution for the benefit and well-being of both humans and wildlife was also a priority, making Dark Sky-compliant lighting a must. By opting for Dialight's next-generation LED fixtures, Rubis reduced energy lighting consumption, along with the greenhouse gases produced as a result, at the new facility by 60 percent compared to conventional lighting. Based on maintenance expenditures at other similar facilities, the company also saved around 100,000 euros per year on maintenance, for lights that were guaranteed to last, multiplying the annual savings accordingly.

- Zero-emissions facility
- Installed over 270 ATEX certified and non-certified fixtures
- Sought alternative to failure-prone fluorescent fixtures
- Reduced energy consumption 60 percent
- 100,000 euros annual maintenance savings

PRODUCT PORTFOLIO High Bays

PRODUCT PORTFOLIO High Bays

VIGILANT® HIGH BAY

For use in non-hazardous indoor and outdoor high bay and occasionally flood lighting applications. Replaces up to 1,000 watt traditional HID fixtures.

Ideally suited for:

- STORAGE/WAREHOUSE
- MAINTENANCE SHOPS
- BOILER ROOM

SAFESITE® HIGH BAY

For use in hazardous classified high bay applications where chemical vapors or explosive dusts are present. See technical spec sheet for applicable certifications.

Ideally suited for:

- PROCESS AREAS
- CHEMICAL STORAGE
- WATER TREATMENT
- LOADING/UNLOADING

RELIANT™ HIGH BAY

For use in indoor non-hazardous applications to replace either HID or Fluorescent fixtures up to 1,000 watts where harsh environment protection is less of a concern.

Ideally suited for:

- STORAGE/WAREHOUSE
- MAINTENANCE SHOPS
- SHIPPING/RECEIVING

VIGILANT® HIGH OUTPUT HIGH BAY- LOW PROFILE

For use in high output or high ceiling non-hazardous indoor and outdoor high bay applications. Replaces up to 1,500 watt traditional HID fixtures with mounting heights up to 100'.

Ideally suited for:

- STORAGE/WAREHOUSE

VIGILANT® LOW BAY

For use in indoor and outdoor lower mounting height high bay applications where wider light distribution is required. Replaces up to 250+ watt traditional HID fixtures.

Ideally suited for:

- WAREHOUSES
- MCC/ELECTRICAL ROOMS
- MAINTENANCE SHOPS

SAFESITE® LOW BAY

For use in lower mounting height hazardous high bay applications where chemical vapors or explosive dusts are present. See technical spec sheet for applicable certifications.

Ideally suited for:

- PROCESS AREAS
- CHEMICAL STORAGE
- LABORATORIES
- LOADING/UNLOADING

WARNING - INSTALLATION & SECONDARY RETENTION. Use of any Dialight products without proper installation (including secondary retention / netting) and periodic inspections could cause severe injury or death. Dialight recommends that all installations should use secondary retention / netting (appropriate to the installation environment) where applicable. It is the exclusive responsibility of the contractor, installer and/or end-user to: (a) determine the suitability of the product for its intended application; and, (b) ensure that the product is safely installed (with secondary retention / netting where appropriate) and in compliance with all applicable laws and regulations. To the extent permissible under applicable laws, Dialight disclaims all liability for personal injury and/or other damage resulting from any dislodgment or other dislocation of its products.

*Occupancy Sensor models available, see Product Specification Sheet

PRODUCT PORTFOLIO Area Lights

VIGILANT® AREA LIGHT

This extremely versatile fixture series can be used in non-hazardous indoor and outdoor applications. Designed for ease of installation, this product line features quick install retrofit kits that support legacy HID fixtures from GE, Crouse, Appleton, Killark and others. See technical spec sheet for more information and additional accessories.

Ideally suited for:

- CATWALKS
- COOLING TOWERS
- LOADING/UNLOADING
- CONVEYORS

SAFESITE® AREA LIGHT

For use in hazardous classified applications where chemical vapors or explosive dusts are present. Designed for ease of installation, this product line features quick install retrofit kits that support many legacy HID fixture brands. See technical spec sheet for hazardous certifications and more information on additional accessories.

Ideally suited for:

- PROCESS AREAS
- CATWALKS
- CONVEYORS
- LOADING/UNLOADING
- CHEMICAL STORAGE

PRODUCT PORTFOLIO

Floodlights

PRODUCT PORTFOLIO

Linear Lights

PROSITE FLOODLIGHT
F1 MODEL

Flood light family designed to replace 250 – 1000W HID units in industrial and hazardous certified areas where chemical vapors or explosive dusts are present. See technical spec sheet for certification information and further details on lumen output options, accessories and optical patterns.

Ideally suited for:

- GENERAL FLOOD LIGHTING
- RAIL YARDS
- PARKING AREAS

PROSITE FLOODLIGHT
F2 MODEL

Flood light family designed to replace 250 – 1000W HID units in industrial and hazardous certified areas where chemical vapors or explosive dusts are present. See technical spec sheet for certification information and further details on lumen output options, accessories and optical patterns.

Ideally suited for:

- TANK FARMS
- WATER TREATMENT
- LOADING/UNLOADING
- CHEMICAL STORAGE

STREETSENSE®
STREET LIGHT

For use in plant maintained roadways, parking areas and general outdoor illumination.

Ideally suited for:

- ROADWAYS/PARKING AREAS

HAZARDOUS LOCATIONS RATINGS

Fixed and portable fixtures for installation and use in hazardous (classified) locations Class I, Divisions 1 and 2, Groups A, B, C, and D; Class II, Division 1, Groups E, F, and G; Class II, Division 2, Groups F and G; and Class III, Divisions 1 and 2, in accordance with the National Electrical Code, NFPA 70

Classes

The classes define the general nature of hazardous material in the surrounding atmosphere.

Class	Hazardous Material in Surrounding Atmosphere
Class I	Hazardous due to the presence of flammable gases or vapors in the air in quantities to produce explosive or ignitable mixtures
Class II	Hazardous due to the presence of combustible and/or conductive dusts
Class III	Hazardous due to the presence of easily ignitable fibers and flyings, such as wood chips, cotton, flax and nylon. Group classifications are not applied to this class

Divisions

The division defines the likelihood of hazardous substances being present in ignitable concentrations in the surrounding atmosphere.

Division	Presence of Hazardous Material
Division 1	The hazard exists during normal operating conditions
Division 2	The hazard is present only due to accidental system breakdowns or abnormal operations

Groups

The group(s) are determined by the specific hazardous materials which may be present.

Group	Hazardous Material in Surrounding Atmosphere
Class I Groups	
Group A	Acetylene
Group B	Hydrogen, fuel and combustible process gases containing more than 30% hydrogen by volume or gases of equivalent hazard such as butadiene, ethylene oxide, propylene oxide and acrolein
Group C	Carbon monoxide, methyl ether, hydrogen sulfide, methylacetylene, cyclopropane, ethyl and ethylene or gases of equivalent hazard
Group D	Gasoline, acetone, ammonia, benzene, butane, cyclopropane, ethanol, hexane, methanol, methane, vinyl chloride, natural gas, naphtha, propane or gases of equivalent hazard
Class II Groups	
Group E	Combustible metal dusts, including aluminum, magnesium and their commercial alloys or other combustible dusts whose particle size, abrasiveness and conductivity present similar hazards in connection with electrical equipment
Group F	Carbonaceous dusts that have more than 8 percent total entrapped volatiles or that have been sensitized by other materials so that they present an explosion hazard. Coal, carbon black, charcoal, and coke dusts are examples of carbonaceous dusts
Group G	Flour dust, grain dust, flour, starch, sugar, wood, plastic and chemicals

WARNING / DISCLAIMERS:

Installation & secondary retention. The use of this product without proper installation (including secondary retention / netting) and periodic inspections, could cause severe injury or death. Dialight recommends that all installations should use secondary retention / netting (appropriate to the installation environment) as applicable. Dialight products are intended for ultimate purchase, installation and operation by knowledgeable persons trained in the functional assessment, installation, use and maintenance of such products and all customers (including but not limited to end customers) are responsible for assessing the suitability of Dialight products for any given installation requirement. It is the exclusive responsibility of the contractor, installer and/or end-user to: (a) determine the suitability of the product for its intended application; and, (b) ensure that the product is safely installed (with secondary retention / netting as appropriate) and in compliance with all applicable laws and regulations.

Product specifications & warranties. All product information provided is, to the best of Dialight's knowledge, accurate as of the date of publication. All values and performance data herein are design or typical values when measured under laboratory conditions. The information herein is subject to change without notice. The products / software detailed herein are subject to applicable warranties and terms and conditions of use/purchase. Unless agreed otherwise in writing by an authorized representative of Dialight, Dialight does not represent that its products are fit for any particular purpose and accepts no liability for the installation and/or unauthorised use of its products. When ordering, refer to www.dialight.com for current versions of: (a) relevant product documentation (including relevant product data sheets); (b) Dialight terms and conditions of sale; and, (c) the relevant product warranties. To the extent that any contract is deemed formed between Dialight and the purchaser of Dialight products and/or an end-user, versions of documents available at www.dialight.com as at the date of sale shall be the versions incorporated therein. In the event of any discrepancy between this document and information provided at www.dialight.com, the latter shall prevail.

Exclusion of liability. To the extent permissible under the relevant law, Dialight disclaims all liability for personal injury and/or other damage resulting from any dislodgment or other dislocation of its products. Whilst Dialight has used its reasonable endeavours to ensure the completeness and accuracy of information herein, Dialight does not assume any liability for damages resulting from use of this information or for any third-party representations made in relation to Dialight products.
