

# DIALIGHT INDUSTRIAL LED LIGHTING

For General  
Manufacturing

Dialight  
.....

AMERICAS

# WHY LIGHTING MATTERS in General Manufacturing Applications

Lighting is of critical importance in industrial manufacturing facilities to maximize both safety and productivity. Manufacturing sites are notorious for harsh conditions that can contribute to premature fixture failure.

Physical hazards and moving objects

High heat and high vibration

Chemical vapors, dust and debris

Noisy, complex heavy machinery

Power surges

# THE COST OF POOR LIGHTING in General Manufacturing Applications

Poor illumination can contribute to tragic work site accidents and injuries in the General Manufacturing sector. Between 2009-2018 the US Bureau of Labor statistics cited:

While significant strides have been made by organizations such as OSHA over the past few decades to improve safety, the General Manufacturing industry inherently involve risks and hazards that demand high quality lighting. When choosing a lighting partner for your facilities, care must be taken to ensure their products have proven to perform safely and reliably in your environments and offer a sustainable solution.

## DIALIGHT SOLUTIONS for General Manufacturing Applications

Dialight is the world leader in industrial LED lighting technology with millions of fixtures installed worldwide. We specialize in lighting products designed for the world's harshest industrial environments – enabling industrial customers to reduce their energy costs, maintenance costs, and carbon footprint while maximizing the safety and productivity of their employees and facility. From our signature High Bay line to our versatile Linear fixtures, Dialight offers a large selection of rugged products ideally suited for environments found within the General Manufacturing Industry.

## WHERE TO USE DIALIGHT PRODUCTS in General Manufacturing Applications

### INTERIOR

- WAREHOUSE & STORE ROOMS
- PROCESS & ASSEMBLY AREAS
- MACHINE & WELDING SHOPS
- SHIPPING & RECEIVING AREAS
- BOILER & ELECTRICAL ROOMS

### EXTERIOR

- FLOOD LIGHTING
- WALL PACK & CANOPY LIGHTING
- WALKWAY LIGHTING
- PARKING LOTS
- ROADWAY LIGHTING

See product portfolio pages for more detailed product and ordering information

## TECHNOLOGY DIFFERENTIATION

When choosing an LED Lighting partner, consider how their products are engineered, constructed and tested prior to making your decision. Most Dialight products are engineered to a **10 year warranty** and were designed with harsh environments, such as General Manufacturing applications, in mind.

### CUSTOM POWER SUPPLIES

Long-life potted drivers with optimized thermal dissipation for protection against environmental contaminants and vibration related failures.

### LOW MAINTENANCE MECHANICAL DESIGN

Sealed and optimized to reduce or eliminate the need for maintenance over the life of the fixture. Easy to install and retrofit to existing infrastructure.

### LATEST LEDS AND ADVANCED OPTICS

Highly efficient, crisp, low-glare illumination. Lighting where you need it, not where you don't.

### INTELLIGENT CONTROLS

Flexibility to group, dim and schedule lights around the unique needs of a facility to maximize energy savings. Plus, seamless integration with existing factory automation.

# APPLICATION GUIDE for General Manufacturing Sites

**1 Vigilant® High Output High Bay - Low Profile**  
 For non-hazardous high ceiling high bay applications typically 40 feet or above

**5 StreetSense® Street Light**  
 For plant maintained roadways and general outdoor illumination

**6 ProSite Floodlight F1 Model**  
 For non-hazardous indoor or outdoor flood lighting applications; multiple beam patterns available

**2 Vigilant® and SafeSite® Area Lights**  
 For non-hazardous and hazardous lower ceiling indoor or outdoor process and stanchion mount applications\*

**7 Reliant™ High Bay**  
 For indoor, light industrial applications and lighter-duty areas of heavy industrial facilities, such as warehouses

**3 Vigilant® and SafeSite® High Bay**  
 For non-hazardous and hazardous indoor or outdoor high bay applications over 14 feet

**8 Vigilant®, SafeSite®, and DuroSite® LP/TC Linears**  
 For non-hazardous and hazardous indoor or outdoor fluorescent strip/vaportite replacements, task or inspection lighting, electrical rooms, shops, and process areas. 4ft and 2ft versions available

**9 ProSite Floodlight F2 Model**  
 For non-hazardous indoor or outdoor high power flood applications (Typical 1,000 watt or better HID replacement)

**4 Vigilant® and SafeSite® Low Bays**  
 For non-hazardous and hazardous lower ceiling indoor or outdoor applications where wider light distribution is critical

## CASE STUDY **G.A. Braun** North Syracuse, New York

To meet growing demand for its state-of-the-art systems, the company recently added a massive, 100,000 square foot expansion to its existing North Syracuse, NY facility, adding much-needed fabrication and assembly space. When it came to choosing lighting for the facility, David Welsh, director of operations, says the company had some stringent requirements. “We’d just switched our existing facility over to T5 fluorescents about 4 years earlier but that was already becoming a problem. The T5s were a maintenance nightmare. The bulbs dimmed after the first year, and they were so cheaply made the bulbs would sometimes actually fall right out of the fixture.” Unfortunately, the T5s weren’t cheap to maintain. With six bulbs per fixture, plus two starters, the systems were very expensive to replace and repair. Braun was spending about \$6,800 a year to change out T5 bulbs, not to mention the storage and disposal of the tubes was also an issue.

Taking advantage of a \$60,000 rebate from NYSERDA for the retrofit project and a \$70,000 rebate from National Grid for the new construction, Braun installed 320 retrofit and 276 new construction fixtures, for a total of 596 Dialight 18K Vigilant industrial LED high bays. In the new facility, Braun opted to add Dialight’s wireless network controls to operate the lights automatically. This way, if someone forgets to turn the lights off at the end of the shift, they’re programmed to go off automatically at a designated time, reducing burn time, energy waste and electricity cost.

In addition to enjoying an outstanding quality of light and better visibility, Braun has also realized a substantial savings beyond the utility rebates. The company is saving \$51,000 a year in electricity alone, plus nearly \$7,000 in maintenance costs by eliminating the need to constantly replace the T5 bulbs and fixtures. And, they no longer have to worry about lights randomly falling from the ceiling for an added safety bonus. Meanwhile, the workers at Braun have been really impressed with the improved lighting, Welsh said. “I’ve had nothing but a good experience with the Dialight fixtures and the Dialight team...For anyone who’s facing the same maintenance disaster I was, I recommend upgrading to Dialight’s fixtures. You’ll be very happy with the results.”

- Replaced 320 T5 fluorescents with Vigilant® High Bays
- Installed a nearly 600 Dialight LED High Bays in existing and new facility
- Saved \$6,800 /year on labor & maintenance costs
- Saved \$ 51,000/year in energy costs
- Redeemed \$130,000 in energy rebates for installing LEDs

## CASE STUDY **Gas Monkey Garage** Dallas, Texas

Gas Monkey Garage is arguably America’s most recognized hot rod shop and is under the watchful eye of millions of TV viewers each week. In addition to the demand for visual clarity, GMG has zero room for downtime in its incredibly tight production schedules. The crew cannot afford to stop work and move cars and other equipment around in order to maintain lighting in the facility. Time is money, and time spent changing lightbulbs is wasted money. Looking for a cutting-edge lighting technology that would meet GMG’s stringent standards for quality and performance—and live up to its demand for maintenance-free equipment, Rawlings and GMG turned to Dialight, the world leader in high-performance, industrial LED lighting for new fixtures in its workshop, “man cave”, merchandise warehouse, paint booth and exterior areas. “We know a thing or two about industrial grade performance and design,” Rawlings said. “When we saw the Dialight fixtures, that was it. The rugged design, performance and longevity of these fixtures sold us, and we’ve been blown away by just how much better we can see now versus the fluorescent fixtures we used to have.”

Inside the main shop, GMG replaced all of its 8-foot, two-lamp T12 and 4-foot, four- and six-lamp T8 fluorescents with 152 of Dialight’s DuroSite 4-foot Linear fixtures. The new fixtures provide the crystal-clear clarity and brightness the mechanics and fabricators need for precision work in a safe environment. In it’s new “man cave” and outdoor lounge area, the team chose Dialight’s 26,500-lumen Vigilant High Bay fixtures to replace the 4-foot, four- and six-lamp T8 fluorescents, and another 44 DuroSite Linears went into its expanded merchandise building. Outside, GMG installed a combination of 5 new Dual Vigilant Flood Lights and DuroSite single floods, along with 8 new 40-watt Vigilant Area Lights to replace it’s antiquated 250-watt HID wall packs. While the primary goal in outdoor illumination was to improve exterior aesthetics, presence and security, the energy savings from the new high-efficiency Dialight fixtures is an added bonus. “Upgrading to Dialight LED High Bay and Linear fixtures meant we were actually able to use fewer fixtures, saving money on top of significant energy savings from the superior efficiency of these fixtures,” Rawlings said. “Plus, these lights will last for the long haul without any maintenance. I can’t say that for fluorescents.”

- Upgraded to 152 Dialight's DuroSite 4-foot Linear fixtures, 26,500-lumen Vigilant High Bay fixtures, 44 DuroSite Linears, 5 Dual Vigilant Flood Lights and DuroSite single floods and 8 new 40-watt Vigilant Area Lights

# PRODUCT PORTFOLIO High Bays

# PRODUCT PORTFOLIO High Bays

## VIGILANT® HIGH BAY

For use in non-hazardous indoor and outdoor high bay and occasionally flood lighting applications. Replaces up to 400 watt traditional HID fixtures.

*Ideally suited for:*

- PROCESS & ASSEMBLY AREAS
- BOILER & ELECTRICAL ROOMS
- SHIPPING & RECEIVING AREAS

## SAFESITE® HIGH BAY

For use in hazardous classified high bay applications where chemical vapors or explosive dusts are present. See technical spec sheet for applicable certifications.

*Ideally suited for:*

- PROCESS AREAS
- CHEMICAL STORAGE

## RELIANT™ HIGH BAY

For use in indoor non-hazardous applications to replace either HID or Fluorescent fixtures up to 1,000 watts where harsh environment protection is less of a concern.

*Ideally suited for:*

- WAREHOUSE & STORE ROOMS
- MACHINE & WELDING SHOPS

## VIGILANT® HIGH OUTPUT HIGH BAY- LOW PROFILE

For use in high output or high ceiling non-hazardous indoor and outdoor high bay applications. Replaces up to 1,500 watt traditional HID fixtures with mounting heights up to 100'.

*Ideally suited for:*

- PROCESS & ASSEMBLY AREAS
- WAREHOUSE & STORE ROOMS

## VIGILANT® LOW BAY

For use in indoor and outdoor lower mounting height high bay applications where wider light distribution is required. Replaces up to 250+ watt traditional HID fixtures.

*Ideally suited for:*

- UTILITIES/BOILER AREAS
- BASEMENTS
- PROCESS AREAS

## SAFESITE® LOW BAY

For use in lower mounting height hazardous high bay applications where chemical vapors or explosive dusts are present. See technical spec sheet for applicable certifications.

*Ideally suited for:*

- PROCESS AREAS
- CHEMICAL STORAGE

# PRODUCT PORTFOLIO Area Lights

# PRODUCT PORTFOLIO Area Light Accessories

## VIGILANT® AREA LIGHT

This extremely versatile fixture series can be used in non-hazardous indoor and outdoor applications. Designed for ease of installation, this product line features quick install retrofit kits that support legacy HID fixtures from GE, Crouse, Appleton, Killark and others. See technical spec sheet for more information and additional accessories.

Ideally suited for:

- CONVEYORS
- PROCESS AREAS
- GENERAL AREAS
- TUNNELS & NARROW SPACES

## SAFESITE® AREA LIGHT

For use in hazardous classified applications where chemical vapors or explosive dusts are present. Designed for ease of installation, this product line features quick install retrofit kits that support many legacy HID fixture brands. See technical spec sheet for hazardous certifications and more information on additional accessories.

Ideally suited for:

- PROCESS AREAS
- TANK FARMS
- CHEMICAL STORAGE

## AREA LIGHT RETROFIT KITS

Dialight's Area Light series is available with quick install retrofit kits to the following products: Eaton's Crouse-Hinds – Champ®, GE Lighting Solutions – Filtr-Gard™, Holophane Petrolux® II, III, Thomas & Betts Hazlux®, Appleton® Mercmaster III, Appleton® Mercmaster II, and Killark® Certilite® & Certilite® V

## AREA LIGHT MOUNTING ACCESSORIES

The Area Light has always been extremely versatile and now with our new Universal Mounting Adapter (HZXUMA), it provides even greater flexibility by allowing you to modify stock you have on-hand to configure based on your needs. All available in Class I, Div. 2, Class II, and Class III certified options.

# PRODUCT PORTFOLIO Floodlights

# PRODUCT PORTFOLIO Linear Lights

## PROSITE FLOODLIGHT F1 MODEL

Flood light family designed to replace 250 – 1000W HID units in industrial and hazardous certified areas where chemical vapors or explosive dusts are present. See technical spec sheet for certification information and further details on lumen output options, accessories and optical patterns.

*Ideally suited for:*

- GENERAL FLOOD LIGHTING
- LOADING/UNLOADING AREAS
- ROADWAYS/PARKING AREAS

## PROSITE FLOODLIGHT F2 MODEL

Flood light family designed to replace 250 – 1000W HID units in industrial and hazardous certified areas where chemical vapors or explosive dusts are present. See technical spec sheet for certification information and further details on lumen output options, accessories and optical patterns.

*Ideally suited for:*

- GENERAL FLOOD LIGHTING
- LOADING/UNLOADING AREAS

## STREETSENSE® STREET LIGHT

For use in plant maintained roadways, parking areas and general outdoor illumination.

*Ideally suited for:*

- ROADWAYS/PARKING AREAS

# HAZARDOUS LOCATIONS RATINGS

Fixed and portable fixtures for installation and use in hazardous (classified) locations Class I, Divisions 1 and 2, Groups A, B, C, and D; Class II, Division 1, Groups E, F, and G; Class II, Division 2, Groups F and G; and Class III, Divisions 1 and 2, in accordance with the National Electrical Code, NFPA 70

## Classes

The classes define the general nature of hazardous material in the surrounding atmosphere.

Class	Hazardous Material in Surrounding Atmosphere
Class I	Hazardous due to the presence of flammable gases or vapors in the air in quantities to produce explosive or ignitable mixtures
Class II	Hazardous due to the presence of combustible and/or conductive dusts
Class III	Hazardous due to the presence of easily ignitable fibers and flyings, such as wood chips, cotton, flax and nylon. Group classifications are not applied to this class

## Divisions

The division defines the likelihood of hazardous substances being present in ignitable concentrations in the surrounding atmosphere.

Division	Presence of Hazardous Material
Division 1	The hazard exists during normal operating conditions
Division 2	The hazard is present only due to accidental system breakdowns or abnormal operations

## Groups

The group(s) are determined by the specific hazardous materials which may be present.

Group	Hazardous Material in Surrounding Atmosphere
<b>Class I Groups</b>	
Group A	Acetylene
Group B	Hydrogen, fuel and combustible process gases containing more than 30% hydrogen by volume or gases of equivalent hazard such as butadiene, ethylene oxide, propylene oxide and acrolein
Group C	Carbon monoxide, methyl ether, hydrogen sulfide, methylacetylene, cyclopropane, ethyl and ethylene or gases of equivalent hazard
Group D	Gasoline, acetone, ammonia, benzene, butane, cyclopropane, ethanol, hexane, methanol, methane, vinyl chloride, natural gas, naphtha, propane or gases of equivalent hazard
<b>Class II Groups</b>	
Group E	Combustible metal dusts, including aluminum, magnesium and their commercial alloys or other combustible dusts whose particle size, abrasiveness and conductivity present similar hazards in connection with electrical equipment
Group F	Carbonaceous dusts that have more than 8 percent total entrapped volatiles or that have been sensitized by other materials so that they present an explosion hazard. Coal, carbon black, charcoal, and coke dusts are examples of carbonaceous dusts
Group G	Flour dust, grain dust, flour, starch, sugar, wood, plastic and chemicals

#### WARNING / DISCLAIMERS:

**Installation & secondary retention.** The use of this product without proper installation (including secondary retention / netting) and periodic inspections, could cause severe injury or death. Dialight recommends that all installations should use secondary retention / netting (appropriate to the installation environment) as applicable. Dialight products are intended for ultimate purchase, installation and operation by knowledgeable persons trained in the functional assessment, installation, use and maintenance of such products and all customers (including but not limited to end customers) are responsible for assessing the suitability of Dialight products for any given installation requirement. It is the exclusive responsibility of the contractor, installer and/or end-user to: (a) determine the suitability of the product for its intended application; and, (b) ensure that the product is safely installed (with secondary retention / netting as appropriate) and in compliance with all applicable laws and regulations.

**Product specifications & warranties.** All product information provided is, to the best of Dialight's knowledge, accurate as of the date of publication. All values and performance data herein are design or typical values when measured under laboratory conditions. The information herein is subject to change without notice. The products / software detailed herein are subject to applicable warranties and terms and conditions of use/purchase. Unless agreed otherwise in writing by an authorized representative of Dialight, Dialight does not represent that its products are fit for any particular purpose and accepts no liability for the installation and/or unauthorised use of its products. When ordering, refer to [www.dialight.com](http://www.dialight.com) for current versions of: (a) relevant product documentation (including relevant product data sheets); (b) Dialight terms and conditions of sale; and, (c) the relevant product warranties. To the extent that any contract is deemed formed between Dialight and the purchaser of Dialight products and/or an end-user, versions of documents available at [www.dialight.com](http://www.dialight.com) as at the date of sale shall be the versions incorporated therein. In the event of any discrepancy between this document and information provided at [www.dialight.com](http://www.dialight.com), the latter shall prevail.

**Exclusion of liability.** To the extent permissible under the relevant law, Dialight disclaims all liability for personal injury and/or other damage resulting from any dislodgment or other dislocation of its products. Whilst Dialight has used its reasonable endeavours to ensure the completeness and accuracy of information herein, Dialight does not assume any liability for damages resulting from use of this information or for any third-party representations made in relation to Dialight products.
