Obstruction LED Solutions

High, Medium & Low Intensity Systems

JANUARY 2024

DIALIGHT IS THE INNOVATION AND MARKET LEADER IN LED OBSTRUCTION SOLUTIONS FOR MORE THAN 20 YEARS

SAFE

Dialight LED systems have Infrared (IR) LEDs for visibility by pilots utilizing Night Vision Goggles (NVGs) or Night Vision Imaging Systems (NVIS).

DIFFERENTIATED

Dialight offers the industry's most comprehensive, energy-efficient and reliable line of LED-based obstruction solution systems in the world. Our precision patented optics ensure maximum safety with minimal ground scatter for community-friendly illumination.

CONVENIENT

Dialight systems offer a small, light-weight flash head for ease of installation, while our low-maintenance fixtures virtually eliminate tower climbs and unplanned site visits for years, dramatically reducing maintenance costs and non-compliance risk.

INTELLIGENT

Dialight controlled LED Obstruction solutions can be seamlessly integrated into existing operation and control centers while providing additional valuable information, both locally and remotely.

TRUSTED

Every Dialight LED Obstruction system is fully certified and compliant with FAA, TC, ICAO, and international standards, for dependability and performance you can trust.

FEATURES & BENEFITS

- Compliant to FAA Infrared (IR) standards AC 150/5345-43J and EB 98
- 5 year warranty
- Resistant to shock and vibration
- High impact polycarbonate lens with UV, scratch and chemical resistant coating
- Reduction in tower climbs for lower maintenance costs/unplanned site visits
- Community friendly lighting system utilizing patented optics

Patented Optics

Minimum ground scatter for a “community-friendly” lighting system

Dialight (LSE: DIA.L) is leading the energy efficient LED lighting revolution around the world for industrial and hazardous areas as well as for transportation and infrastructure applications. For 40 years we have been committed to the development of LED lighting solutions that enable organizations to vastly reduce energy use and maintenance needs, improve safety, ease disposal and reduce CO2 emissions.

INEM[®] Remote Control & Monitoring System

Cellular & Ethernet Connectivity

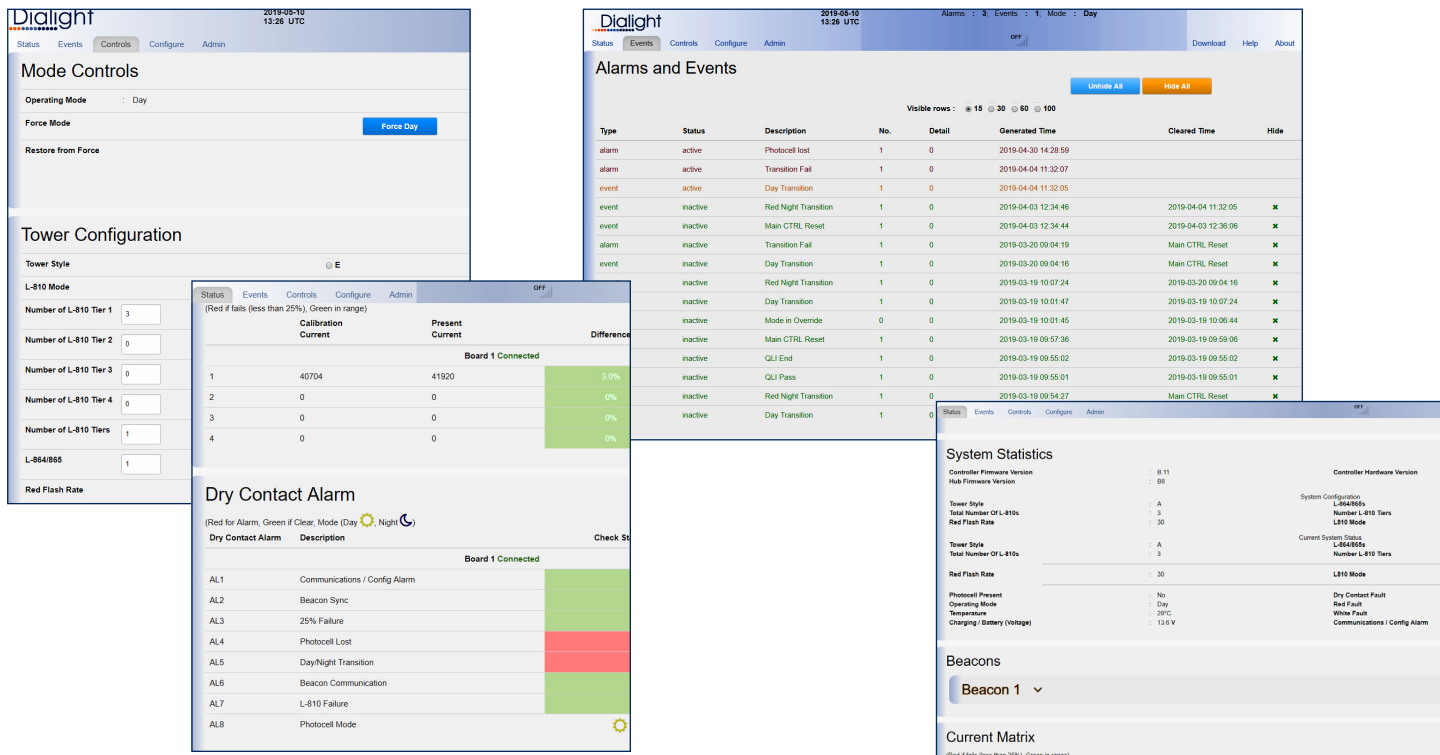

Application

Dialight's INEM[®] Obstruction Lighting Remote Control and Monitoring System is an integrated software application that enables remote management and tracking of lighting systems via ethernet, cellular, and/or local wifi networks. The system is also capable of transmitting SNMP traps for NOC integration. Operating in conjunction with Dialight's Obstruction Lighting controllers, the INEM[®] system can be packaged as a standalone unit or be integrated into Dialight controller cabinets. The INEM[®] system operates with red low/medium intensity (L-810/L864), dual red/white medium intensity (L-864/L-865), or high intensity (L-864/L-856) lighting systems.

Features & Benefits

- Web interface to configure, control, and monitor lighting system
- User friendly Graphical User Interface (GUI)
- Remote lighting inspections
- Over-the-air system programming for software updates
- Alarm/event logging
- Data reports
- Local wifi to access/ configure system
- Provisions for battery back-up connectivity with low voltage disconnect
- New systems or retrofit existing systems
- Compatible with NOC software
- SNMP trap flexibility
- Can be used with cellular modem or ethernet

INEM® Obstruction Lighting Remote Control & Monitoring System GUI

Remote or Onsite Web Interface Provides:

- Lighting system status and diagnostics
- Configuration options
- Control of lighting system
- Ability to change modes
- Initiation of lighting inspections
- Over-the-air programming
- Event and alarm logs
- Data reports
- Remote system reset
- Site information

Features & Benefits

- 5 year warranty
- ETL verified to FAA standards
- IR wavelength at 850 nm
- Superior surge and lightning protection
- Controller can be mounted at the base of the structure
- IP66/NEMA 4X outdoor rated enclosures
- Low power consumption
- IP66 rated light fixtures
- Impact and vibration resistant
- Provision for padlock on the enclosure
- Patented optics for minimal down light/ground scatter
- Dry contacts for alarm monitoring/status

Vigilant® LED Medium Intensity System L-864 / L-865

Medium Intensity (Red / White) System with Infrared (IR)

FAA Type D & E

Application

Dialight's LED based obstruction system is ideal for D & E style FAA communication tower types and can be used to mark other structures as well. The operation of the lights is configurable and fully monitored. The side markers can be run in steady burn or flashing mode. The lights are ETL verified to the FAA requirements.
